

Geometric Grisaille

Brief description: 13th century grisaille stained glass panel. Three interlocking circles, unpainted.

A 13th century grisaille stained glass panel with three interlocking circles. The panel is unpainted and formed mainly of white glass with pieces of red, blue and amber in inner circles. Despite its great age, this 13th-century panel not only still has most of its original medieval glass, but also most of its original lead. The rough surface of the lead, cast in moulds, has been planed, giving it a distinctive faceted appearance. The glass is unpainted and therefore relies on the pattern of the leads for its decorative effect. The clear glass is lightly tinted as a result of the impurities in the raw materials that were used to make it. This kind of simple glazing, known as grisaille, is often associated with Cistercian churches, in which it expressed the simplicity of the Cistercian monastic ideal. It was also popular wherever a higher level of light or a cheaper form of glazing was requested.

Object type: panel

Number of objects: 1

Production date: circa 1200-1250

Production period: Medieval

Designer: English Artist

Manufacturer: English Artist

Dimensions: Height: 818 mm, Width: 323 mm

Acquisition: purchase 2005

Acquisition source: Fisher, Alfred

Accession number: ELYGM:1990.4
