Muff

Brief description: Partly blown muff in clear glass. Still has a round end.

A 'muff' is a cylinder of blown glass. The cylinder is cut off at both ends and then opened and flattened to create a sheet of glass. This sheet can then be cut and used in the making of stained glass windows. This one is only partially blown, with one end still intact, and nicely demonstrates the blowing stage of the process.

Object type: glass fragment

Number of objects: 1

Production date: 1

Acquisition: gift

Acquisition source: Hetleys Sunderland, England

This item is not currently on display and can only be viewed by prior arrangement

Accession number: ELYGM:2008.8.15
