Pressed Glass Glass

Brief description: Pressed slab glass with blue swirl pattern. Produced by Whitefriars and used by Leonard Walker.

Slab glass is created by blowing glass into a box-shaped mould. This produces a cube where the walls are thicker in the centre and thinner towards the edges. The cube is then split, producing five flat sheets of glass (the four sides and the bottom). The varying thickness of the resulting glass 'slabs' creates refractions and colour shifts in the glass, causing it to 'hold' light and produce a glowing effect sought after in various types of stained glass art.

Object type: glass fragment

Number of objects: 1

Production date: 1

Production period: 20th century

Designer: Leonard Walker

Manufacturer: Whitefriars

Dimensions: Height: 152 mm, Width: 160 mm

Original location: The Glass House London England The Glass House

Acquisition: gift

Acquisition source: C. & T. Benyon

This item is not currently on display and can only be viewed by prior arrangement

Accession number: ELYGM:2008.9.8
